10147	BISI-2150-02	Microcomputer Applications	Avon Williams Campus	MWF	AM 11:30	PM 12:30	3

**ART 4400 - Intro/Desktop Publishing.** Adobe Creative Suite (CS) basics, screen, menus, palettes, and other tools used together to create, modify, close, and open publications.

**INDS 1000 - Prior Learning Assessment Theory and Practice.** An accelerated course that will help students to identify areas of learning they may want to have evaluated for college-level equivalency. This course guides students through the preparation and compilation of all components required for the evaluation of a portfolio of prior learning through LearningCounts.org. Students must successfully complete INDS 1000 in order to submit their portfolios using the LearningCounts portfolio tool; a student's first portfolio within six (6) months of the start date of this course. Students will build their portfolio based on other Tennessee State University courses (e.g., CRMJ 3010).

**SPAN 1010 - Elementary Spanish I.** A beginning course in Spanish. The four skills of listening comprehension, speaking, reading, and writing are taught with emphasis on oral proficiency in everyday situations. For students with no previous knowledge of the language. This course may be applied toward removing a high school deficiency in foreign languages, in which case it does not yield credit toward the undergraduate degree.

**MUSC 1010 Music Appreciation.** Emphasis upon development of listening skill and on a broad repertoire of literature, including both Western and Nonwestern music. History is included to help provide deeper meaning to the development of the music being studied. Course applies toward satisfaction of University general education humanities requirement.

**BISI 2150 - Microcomputer Applications (3).** This course is designed to give students hands-on experience to microcomputer applications (word processing, spreadsheet, database, and other business applications including the Internet). All applications software utilized are windows based. Therefore, an introduction to the Windows platform as well as a brief overview of microcomputer concepts is included as components of this course. This course can be used to satisfy a microcomputer applications proficiency requirement at most four-year institutions.
