Please respond to the following questions:

23. What is the best thing the instructor did to help you learn, and what should the instructor improve in this course?

- I have had never studied any such course before and it seemed like difficult when I looked at the syllabus and notes. But once he started teaching it all became so easy and he was very thorough. I specially like the fact that he use figures and charts to explain pathways and walk you through each step. That was very helpful and it made it so easy to revise the materials later on because I had story in my mind. I knew nothing about pharmacology before I took this course because I have background in agriculture and now I know a whole lot of things about this subject and its all because of him. I really appreciate the efforts he put in his teaching so students can make most out of the course. (CHEM-6800-1-82600-Fa17-VercruysseKoen)
- Dr. V is one of TSU's finest, most knowledgeable professors. He has the ability to make difficult subject matter easy to comprehend, as well as, easy to explain to other peers. I highly recommend all of the classes (6) that I have taken thus far: they are all necessary for my field of research. All of the class material taught will be highly beneficial for my future academic success. (CHEM-6800-1-82600-Fa17-VercruysseKoen)
- Go into depth about each chapter. (CHEM-6800-1-82600-Fa17-VercruysseKoen)

24. With reference to technology, tutorial support, and the prerequisite for this course, if applicable, what changes would you suggest to the University to make this a better course?

- Only issue with our class was that the classroom had broken projector and he had to make it work. I wish if university can fix it for next class it would be helpful for future students. But he didn't let that came in his way of teaching. He is very good at keeping you engaged during the lecture with references from real situations, medical problems and research studies etc. So it didn't effect my study.
