

Research Methods  
AGSC 5110  
Homework #6 (30 points)  
Due: April 6, 2020

1. Create a materials and methods section (with bibliography) for research you will, are, or would like to be doing. Whether or not you have already done the research, write everything in future tense. Use materials and methods sections from other research articles as a guide to set this up.
2. Make sure to include a discussion of equipment, procedures, designs, and statistical analyses you will be using (explain these specifically, don't explain general concepts related to these items).
3. Include in-text citations for methods that will be used and use proper formatting for these citations within the bibliography.
