Major:

Soph. Biology

Research Advisor(s):

Dr. Brenda McAdory

Dr. Margaret Whalen

Dr. Joshua Moore

Current Research:

Dr. Whalen: tests the effects of selected environmental contaminants on human natural killer immune function.

Dr. Moore: does research on Nanocomposites simulating nanoscale semi conductors.

Dr. McAdory: tests the tissue of mice brains for memory development using certain types of proteins.

Long-term goals: (Future career)

Orthodontist

Personal interests:

My main interest is in any type of medical research, but I also enjoy other forms of research

Nano-Bio Core Research Goals:

I hope to gain knowledge about research that will be beneficial to me in the future.
