Desired greenhouse type: Glasshouse Evaporative Cooling Open-Roof
 Polyhouse Evaporative Cooling Polyhouse Natural Cooling

Total greenhouse space needed:

Project duration from date _____ to date _____

List all plant species that will be used in this project:

Brief Project description that includes objectives and expected outcomes:

Responsibilities of the PI

The PI is responsible for all planting, seeding, irrigating and harvesting of all products being grown in the greenhouse as well as pest and disease control.

The PI is also responsible to report **in writing** all mechanical malfunctions in the greenhouse.

Note: Research and Extension projects must be approved by the Associate Dean that you report to. All projects must be relevant to Tennessee agricultural industries. All greenhouse spaces being used must be kept clean and orderly. No use of greenhouses for personal plants or for personal benefit.

Provided by the College

Storage area for common chemicals and materials.
