### INTERNSHIP PROGRAM OVERVIEW AND PROCEDURES

The primary objective of College of Business Internship courses is to reinforce and enhance the theoretical knowledge received in the classroom with practical on-the-job experiences. With the completion of the lower division foundation courses, students have an opportunity to both apply and observe many of the tools, principles, and practices learned in the classroom in a real-world business, industry, or governmental setting.

#### Internship Requirements

Students must meet the following requirements to complete an internship:

- Internship hours must be performed during the duration of the semester in which the student is enrolled in the course. Internships from prior semesters will not be accepted.
- Students must work at least 15-20 hours per week on an approved internship throughout a full academic semester or a minimum of 20 hours per week throughout the summer.
- A maximum of six credit hours earned in business internship and independent study courses (combined) may be applied to degree requirements.
- Approval by the appropriate department chair or COB administrator is required to enroll in an internship course.
- The internship must take place in an office setting. Students cannot telecommute or work from a home setting.
- The company must be willing and able to evaluate the student's performance using a survey distributed by the College of Business—Center of Experiential Learning & Career Engagement Office.
- The internship cannot consist of door-to-door selling or pure cold calling.
- The internship can only include 10 percent clerical work.
- Students cannot intern for a family member.
- Students cannot intern at their own business.

#### **Responsibilities**

You have many responsibilities as an intern. Meeting your responsibilities will be factored heavily in your internship grade and may determine whether you are offered a job as a result of your internship. There is never any promise of a job from your internship, however, when offers are made, it is often because of the sense of responsibility and job performance on your internship.

#### Internship Orientation

The orientation is scheduled during the first week of September and is designed to help prepare students make the most of the internship experience. The orientation will entail a discussion of course requirements and business behavior along with related available student resources. It's important to remember that internships are an academic related experience and regular communication with the faculty and the director of Experiential Learning & Career Engagement will help you benefit from the internship experience.

#### Student Evaluation of Internship

It is important that you take time to evaluate your experience at the conclusion of the internship period. Worthwhile learning can take place during this period of reflection, as you mull over the tasks you have performed, the working relationships that you have developed, aspects of the career field which you find compelling or uninteresting, and assess your ability to handle the job and its related responsibilities.

#### **Employer Evaluation of Student Performance**

An essential part of your internship is your employer's evaluation of your job performance. Your direct supervisor is asked to evaluate your communication, problem solving and technical skills as well as your ability to work in a team environment, your initiative, dependability, ability to learn, and the quality of your work. The employer's evaluation counts for 60% of your grade for the internship.

#### Internship Course Final Report

Upon completion of the internship, the student must submit a written report to the course instructor on the last day of class. The "Format for Internship Final Report" on page 7 of the internship guide provides students with guidelines for the report. As stated in the instructions, the student should address the following:

- The background of the host organization;
- The business operations of the host organization (i.e., SWOT analysis, organizational structure, marketing strategy, and competitive strategy);
- Responsibilities as a student intern (i.e., duties, accomplishments, new knowledge acquired, problems encountered, and how experience impacts your current choice of career); and
- Brief summary of selected text.

#### **End-of-Semester Presentation**

Along with the internship written report, students are required to present orally, the information discussed in the report at the end of the semester in accordance with the internship timeline (see page 4).

#### **INTERNSHIP CHECKLIST**

Unless otherwise stated, the following information and/or tasks are to be completed and submitted to:
