

How to Register Game Console

Step 1: Open your web browser and go to <https://clearpass.tnstate.edu/guest>. and login with your MyTSU username and password. Your username is the portion of the email address before the @my.tnstate.edu. Ex: The username for jdoe123@my.tnstate.edu is only jdoe123. After clicking login, you will arrive at the Gaming Console Registration Page.

The image contains two side-by-side screenshots. The left screenshot shows a 'TSU Wi-Fi' login page with a 'Username' field containing 'jdoe123' and a 'Password' field with masked text. A red circle highlights the 'Log In' button. A blue arrow points from this button to the text 'Click Here.' The right screenshot shows a 'Create Device' page with a header 'New device being created by studenttest.' It has fields for 'Device Name' (marked with a red asterisk) and 'MAC Address' (also marked with a red asterisk). Below these fields are instructions: 'Please name your device.' and 'Enter your device's Wireless MAC addresses. For example 12:34:56. Please refer to your device user manual for help locating the Wireless MAC address.' A 'Logout' link is also visible in the top left of the registration page.

Step 2: Before completing the registration page, already have the **MAC Address** of your gaming console available. You can do a Google search for “Find Mac address on {game console}” for instructions on obtaining your gaming console MAC Address. The MAC address should be 1a:2b:3c:4d:5e:6f

The image contains two side-by-side screenshots. The left screenshot is a Google search results page for 'Find Mac address on PS5'. It shows a list of steps: 1. From the Playstation Home screen, select Settings in the upper right. 2. Select System. 3. Select System Software. 4. Select Console Information. 5. The MAC address will be listed by MAC Address(Wi-Fi). The right screenshot is a device configuration page showing network settings. It lists 'System software', 'IPv4 address', 'IPv6 address', 'MAC address (LAN cable)', and 'MAC address (Wi-Fi)'. The 'MAC address (Wi-Fi)' field is highlighted with a red box and an arrow points to the text 'PS5 MAC Address Example' above it. The MAC address value '1a:2b:3c:4d:5e:6f' is also highlighted with a red box and an arrow.

Step 3: Complete the registration form like the example below. In the notes, include your **name, T#, mytsu email, dorm building, dorm room, game console type, and phone#**. This detailed information will be helpful for our IT staff if any service is needed. Once completed, click **Create** and your game console will instantly register to our network and you can now enjoy your online gaming experience!
