

Course Name	Faculty Qualifications Needed	Related Disciplines	Acceptable Alternative Qualifications
HCAP 6515 Health Organizations and Delivery Systems	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Public Administration	Acceptable alternative qualifications include substantial academic or professional experience analyzing and managing U.S. health care delivery systems, including organizational structures, financing mechanisms, technology impacts, utilization determinants, and the roles of federal agencies and private sectors. Individuals with peer-reviewed publications, significant leadership or consulting experience in healthcare organizations, major policy or systems reports, or instructional materials on health systems organization and delivery will also be considered.
PUBH 5010 Biostatistics	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Biostatistics, Epidemiology	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or statistics, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 5020 Environmental Health Science	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Environmental Science, Epidemiology	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 5100 Principles of Epidemiology	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Epidemiology, Biostatistics	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or epidemiology, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.

PUBH 5110 Management & Public Health Policy	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Health Policy and Management	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or health policy and management, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 5120 Behavioral Science and Public Health	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Behavioral Science, Psychology	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or behavioral science, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6000 Public Health Field Placement	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Health Policy and Management	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6020 Health Communication	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Health Communication, Communications	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or health communication, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6030 Cultural Competency I	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Sociology and Anthropology, Sociology, Community Health	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.

PUBH 6040 Public Health Ethics	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Health Policy, Bioethics	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6050 Understanding Health Disparities	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Health Policy, Community Health	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6070 Public Health and Disaster Preparedness	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Environmental Health Science, Health Policy	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6090 Seminar: Critical Issues in Public Health	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Medicine, Community Health	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6100 Capstone Project	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Medicine, Community Health	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or epidemiology, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.

PUBH 6160 Principles of Public Health Education	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Health Education	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6170 Program Development and Evaluation	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Community Health	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6220 Race, Ethnicity, Gender, and Health Care	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Sociology and Anthropology, Community Health	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or sociology and anthropology, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6230 HIV/AIDS and Public Health	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Epidemiology, Virology	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6260 Social Marketing	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Marketing	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.

PUBH 6270 Multicultural Perspectives in Health and Health Care	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Community Health, Sociology and Anthropology	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 6300 Cultural Competency II	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Sociology and Anthropology, Sociology, Community Health	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 7010 Statistical Analysis I	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Biostatistics, Epidemiology	Acceptable alternative qualifications include substantial academic or professional experience applying regression-based methods to public health data, including ANOVA/MANOVA, linear and generalized linear models, logistic, multinomial, and Poisson regression. Proficiency with statistical software such as SPSS and SAS for data management and analysis is highly valued. Individuals with peer-reviewed publications, major analytic reports, or instructional materials in biostatistics or quantitative public health, as well as significant experience teaching or consulting on statistical methods in health research contexts, will also be considered.
PUBH 7020 Statistical Analysis II	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Biostatistics, Epidemiology	Acceptable alternative qualifications include substantial academic or professional experience applying regression-based methods to public health data, including ANOVA/MANOVA, linear and generalized linear models, logistic, multinomial, and Poisson regression. Proficiency with statistical software such as SPSS and SAS for data management and analysis is highly valued. Individuals with peer-reviewed publications, major analytic reports, or instructional materials in biostatistics or quantitative public health, as well as significant experience teaching or consulting on statistical methods in health research contexts, will also be considered.

PUBH 7030 Cultural Competency	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Sociology and Anthropology, Sociology, Community Health	Acceptable alternative qualifications include substantial academic or professional experience designing, implementing, and evaluating culturally competent health programs and policies; managing the dynamics of cultural difference in service delivery; and assessing how federal laws, initiatives, and regulatory frameworks shape culturally responsive care. Demonstrated expertise using trans-cultural frameworks (ethnomedical, biomedical, legislative), applying emic and etic perspectives, conducting qualitative or mixed-methods evaluations of cultural competency initiatives, and producing policy briefs or guidance for diverse stakeholders is highly valued. Individuals with peer-reviewed publications, significant community-engaged projects, or instructional materials focused on cultural competence in public health practice will also be considered.
PUBH 7060 Qualitative Research Design & Analysis	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Biostatistics, Epidemiology	Acceptable alternative qualifications include substantial academic or professional experience in qualitative research design and analysis, including development of study designs, data collection through observations, interviews, focus groups, and document analysis, rigorous coding and thematic analysis, interpretation of findings with diverse populations, and attention to ethical considerations in qualitative inquiry. Demonstrated proficiency with qualitative analysis software (e.g., NVivo, ATLAS.ti, Dedoose), peer-reviewed publications, significant project reports, or instructional materials in qualitative methodology or applied social/behavioral health research will also be considered.
PUBH 7080 Environmental Health	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Environmental Toxicology, Environmental Policy and Regulation	Acceptable alternative qualifications include substantial academic or professional experience assessing environmental and occupational exposures, conducting environmental health assessments and risk analyses, and evaluating how socioeconomic status and the built environment influence health outcomes in vulnerable communities. Demonstrated expertise with federal and state regulatory frameworks (e.g., EPA, OSHA), development of infrastructure or policy solutions for chronic disease prevention, and community-based or environmental justice research is highly valued. Individuals with peer-reviewed publications, major technical or policy reports, or instructional materials in environmental health or related areas will also be considered.

PUBH 7100 Advanced Epidemiologic Methods	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Epidemiology, Biostatistics	Acceptable alternative qualifications include substantial academic or professional experience designing and analyzing epidemiologic studies to achieve or approximate causal inference, including proficiency with diverse study designs (e.g., cohort, case-control, longitudinal), advanced quantitative methods, estimation of causal effects, and the use of SAS for data management and analysis. Individuals with peer-reviewed publications, major analytic reports, instructional materials in advanced epidemiologic methods, or significant consulting/leadership roles on epidemiologic research projects will also be considered.
PUBH 7110 Program Planning & Evaluation	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Project Management	Acceptable alternative qualifications include substantial academic or professional experience conducting process, outcome, and participatory evaluations of public health programs; designing and critiquing evaluation research using common public health study designs; developing conceptual evaluation frameworks, indicator networks, and measurement/data collection strategies; and preparing comprehensive evaluation plans to assess intervention impact. Individuals with peer-reviewed publications, major evaluation reports or grants, recognized instructional materials, or significant leadership in applied public health evaluation projects will also be considered.
PUBH 7120 Management & Public Health Policy	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Health Policy and Management	Acceptable alternative qualifications include substantial academic or professional experience in U.S. health policy analysis and development, including engagement with federal, state, and local reform agendas; evaluation of economic, social, ethical, and political forces in the policy process; and direct work with key stakeholders such as special interest groups, lobbyists, media, elected officials, legislative staff, and public agencies. Individuals with peer-reviewed publications, major policy reports or briefs, legislative testimony, significant leadership or consulting roles in health policy organizations, or instructional materials on health policy and management will also be considered.

<p>PUBH 7150 Healthcare Economics & Finance</p>	<p>Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.</p>	<p>Finance/Economics</p>	<p>Acceptable alternative qualifications include substantial academic or professional experience in financial management of healthcare organizations—such as budgeting, cost analysis, reimbursement systems (e.g., Medicare/Medicaid), revenue cycle management, capital budgeting, and financial statement analysis for hospitals, long-term care facilities, or medical groups. Evidence of peer-reviewed publications, major financial or policy reports, professional certifications (e.g., HFMA, FACHE, CPA with healthcare emphasis), or development of instructional materials in healthcare economics and finance will also be considered.</p>
<p>PUBH 7210 Mixed Methods Research</p>	<p>Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.</p>	<p>Epidemiology, Biostatistics</p>	<p>Acceptable alternative qualifications include substantial academic or professional experience designing and executing mixed methods studies, including selection of appropriate designs (e.g., convergent, explanatory or exploratory sequential, embedded), integration strategies for qualitative and quantitative data, development of joint displays, and rigorous reporting and evaluation of mixed methods findings. Demonstrated proficiency with relevant analytic software (e.g., NVivo/ATLAS.ti for qualitative, SPSS/SAS/R for quantitative), plus peer-reviewed publications, major evaluation reports, or instructional materials in mixed methods research will also be considered.</p>
<p>PUBH 7220 Behavioral Science Theory and Practice</p>	<p>Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.</p>	<p>Behavioral Science, Health Education, Psychology</p>	<p>Acceptable alternative qualifications include substantial academic or professional experience designing, implementing, and evaluating health behavior interventions at individual, organizational, and community levels; demonstrated application of contemporary behavioral theories and models (e.g., Health Belief Model, Social Cognitive Theory, Theory of Planned Behavior, Transtheoretical Model, Diffusion of Innovations) to chronic disease, HIV/AIDS, or other public health issues; and experience integrating multidisciplinary perspectives from psychology, sociology, epidemiology, and communication. Individuals with peer reviewed publications, major program reports, funded grants, or instructional materials in behavioral science theory and health education will also be considered.</p>

<p>PUBH 7230 Health Disparities</p>	<p>Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.</p>	<p>Community Health, Epidemiology</p>	<p>Acceptable alternative qualifications include substantial academic or professional experience investigating racial and ethnic health disparities, measuring their prevalence, and applying theoretical frameworks such as social determinants of health, structural racism, intersectionality, or life-course perspectives. Experience conducting or supervising community-based or mixed-methods research, analyzing disparity data, developing and evaluating interventions or policies to reduce gaps in health status, and producing peer-reviewed publications, major reports, or instructional materials on health disparities will also be considered.</p>
<p>PUBH 7240 Maternal, Child, & Family Health</p>	<p>Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.</p>	<p>Community Health</p>	<p>Acceptable alternative qualifications include substantial academic or professional experience in maternal, child, and family health research or practice, particularly focused on the life course perspective. Expertise in examining adverse childhood experiences (ACEs), trauma-informed frameworks, and multilevel social ecological models to explain health outcomes across the lifespan is highly valued. Familiarity with analyzing racial and ethnic disparities in MCH, applying theoretical models of health inequity, and developing interventions to address systemic and historical trauma will also be considered. Individuals with peer-reviewed publications, major program evaluations, community-engaged research, or instructional materials in MCH and health equity are encouraged to apply.</p>
<p>PUBH 7260 Public Health & Intersectionality</p>	<p>Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.</p>	<p>Community Health</p>	<p>Acceptable alternative qualifications include substantial academic or professional experience applying intersectionality frameworks to public health, analyzing how intersecting identities (e.g., race, gender, SES, sexual orientation) and power structures shape health outcomes and access to care, and designing or evaluating interventions and policies to advance health equity and social justice. Experience with qualitative and mixed-methods research, community-engaged or participatory approaches, and production of peer-reviewed publications, major policy reports, or instructional materials on intersectionality and health disparities will also be considered.</p>

PUBH 7270 Grant Writing	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Community Health	Acceptable alternative qualifications include substantial professional experience (e.g., publications, awards) in public health, health administration and health sciences or public health, relevant professional licensure/certifications, and notable scholarly work such as published articles or conference presentations in public health, health administration and health sciences related fields.
PUBH 7900 Quantitative Research Design & Analysis	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Epidemiology, Biostatistics	Acceptable alternative qualifications include substantial academic or professional experience in quantitative research methodology, including study design (experimental, quasi-experimental, observational), data collection and management, inferential procedures, statistical modeling and analysis, data interpretation, and reporting for public health research. Proficiency with statistical software (e.g., SAS, SPSS, R or Stata), peer-reviewed publications, major analytic or evaluation reports, or development of instructional materials in quantitative research design and analysis will also be considered.
PUBH 8000 Dissertation	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Epidemiology, Biostatistics, Community Health	Acceptable alternative qualifications include substantial academic or professional experience conducting and supervising original doctoral research, including proposal development, study design, data analysis, interpretation, and scholarly reporting; service on or leadership of dissertation committees; a strong record of peer reviewed publications, funded grants, or major technical reports; and demonstrated ability to mentor students in producing independent, theoretically grounded, and methodologically rigorous contributions to the public health field.
PUBH 8100 Doctoral Seminar: Critical Public Health Issues and Leadership	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Epidemiology, Biostatistics, Community Health	Acceptable alternative qualifications include substantial academic or professional experience leading doctoral-level seminars on critical public health issues; facilitating interdisciplinary dialogue with faculty and external experts; mentoring doctoral students in research dissemination, leadership development, and scholarly critique; and organizing recurring seminar series. Evidence of peer-reviewed publications, funded grants, major policy or technical reports, significant leadership roles in public health organizations, or development of instructional materials for advanced seminars will also be considered.

PUBH 8110 Special Topics	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Epidemiology, Biostatistics, Community Health	Acceptable alternative qualifications include substantial academic or professional experience developing and delivering courses on rapidly emerging public health topics (e.g., SARS CoV 2, Mpox, climate-related health threats), leading outbreak or emergency responses, and producing timely policy or technical guidance. Evidence of peer reviewed publications, major reports or briefings, funded rapid-response projects, or instructional materials addressing contemporary public health issues will also be considered.
PUBH 8230 Public Health and Aging	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Geriatric Medicine, Community Health	Acceptable alternative qualifications include substantial academic or professional experience examining the demography and epidemiology of aging populations, developing or evaluating public health policies and systems for older adults, and conducting work on successful aging, physical frailty, dementia care, and end of life care. Individuals with peer reviewed publications, major policy or program reports, instructional materials, or significant leadership in aging-focused public health initiatives will also be considered.
PUBH 8240 Health Communication & Literacy	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Community Health, Communications	Acceptable alternative qualifications include substantial academic or professional experience developing and evaluating health communication strategies and health literacy initiatives for diverse audiences and community sectors; applying plain-language principles, cultural tailoring, and social marketing or risk communication techniques; and integrating communication methods into public health programming and research. Peer-reviewed publications, major campaign or program reports, instructional materials, or significant leadership in health communication and literacy projects will also be considered.
PUBH 8250 Community-Based Research & Public Health Interventions	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Epidemiology, Biostatistics, Community Health	Acceptable alternative qualifications include substantial academic or professional experience in community-based participatory research (CBPR); community organization strategies such as empowerment, coalition building, community competence, and media advocacy; and the planning, implementation, and evaluation of public health interventions to address major health problems. Peer-reviewed publications, major community intervention reports or funded projects, instructional materials, or significant leadership in community-engaged public health initiatives will also be considered.

PUBH 8280 Disability & Mental Health Services	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Mental Health Science, Social & Behavioral Health Sciences	Acceptable alternative qualifications include substantial academic or professional experience addressing disability and mental health from medical, psychosocial, vocational, political, and cultural perspectives; applying the biopsychosocial model; and evaluating how education, employment, and environment affect health and well being for people with disabilities. Expertise in assessment and classification of psychological disorders, treatment options within the U.S. health care system, mental health programming, and culturally competent service delivery is highly valued. Peer reviewed publications, major program or policy reports, instructional materials, or significant leadership in disability/mental health services or public health interventions will also be considered.
PUBH 8290 Diversity in Urban and Rural Settings	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Community Health	Acceptable alternative qualifications include substantial academic or professional experience analyzing social, economic, and health differences between urban and rural populations; applying multicultural and diversity frameworks to public health practice; and designing, implementing, or evaluating interventions that address disparities across community contexts. Peer-reviewed publications, major program or policy reports, community-engaged research, or instructional materials focused on urban/rural health diversity and equity will also be considered.
PUBH 8310 Spirituality and Health	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Holistic Medicine	Acceptable alternative qualifications include substantial academic or professional experience examining links between spirituality/religiosity and health outcomes, partnering with faith communities to promote health, and integrating spiritual dimensions into public health interventions and programs. Evidence of peer-reviewed publications, major program or policy reports, community-engaged research with faith-based organizations, or instructional materials on spirituality and health will also be considered.

PUBH 8330 Global Health Issues	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Global/International Health Science	Acceptable alternative qualifications include substantial academic or professional experience analyzing and comparing multinational health care systems, leading or contributing to global health policy initiatives, and evaluating reforms across federal, state, and international contexts. Expertise engaging key stakeholders (e.g., ministries of health, NGOs, multilateral agencies, advocacy groups, legislators, and the media), and addressing economic, social, ethical, and political drivers of policy is highly valued. Individuals with peer-reviewed publications, major policy briefs or reports, international fieldwork or program management, or instructional materials in global health systems and policy will also be considered.
PUBH 8330 Global Health Issues	Earned Doctorate degree in Public Health, Health Administration and Health Sciences in the teaching discipline or a closely related discipline.	Global/International Health Science	Acceptable alternative qualifications include substantial academic or professional experience comparing and evaluating multinational health care systems, assessing reform efforts and policy transfer ("lessons from abroad"), and leading seminars with guest experts on integrative global health topics. Peer-reviewed publications, major policy briefs or reports, international fieldwork or program management, or instructional materials focused on global health systems and policy will also be considered.
