

Roosevelt Luster III graduated from Tennessee State University in 1997, with a Bachelor of Science degree in Electrical Engineering. He is currently a Senior Project Manager with Tesla. He is responsible for leading cross functional teams to ensure operational performance of Utility Scale Battery Plants (Battery Plants that power cities the size of Nashville, TN).

As a testament to Roosevelt's commitment to the University he is the 2004 winner of the State of Tennessee philanthropist award and an alumni life member since 2002. He has an established scholarship within TSU's foundation designed to support engineering students in their final years of graduation. He has lightened the load for at least one student every year since graduation.
