

**Major:**

Sr. Biochemistry

**Research Advisor(s):**

Dr. Koen Vercruysse

**Current Research:**

Synthesizing and screening nanoparticles

**Long-term goals: (Future career)**

I would like to become a medical doctor

**Personal interests:**

my personal interests are playing volleyball, swimming, and dancing.

**Nano-Bio Core Research Goals:**

My goals are to become familiarize with different scientific equipments and learn how to use them efficiently. I also want to build a network with my advisers and also with the students I work along with. I am also looking forward to taking what i learn over the summer and continue this work and passing along the knowledge I obtained to other students.
